Education

Software Engineering

From April 2021 to January 2026 **Adama Science and Technology University** Adama, OR, Ethiopia
BSc in Software Engineering

Udacity Graduate

From November 2025 to December 2025 **Udacity** Online

Programming Fundamentals Certificate: www.udacity.com/certificate/e/5bce5b2a-d29f-11f0-9847-13ede6cc46c7

Data Analysis Fundamentals Certificate: www.udacity.com/certificate/e/814bebfad2a0-11f0-9650-abeb61a954a7

Work experience

AI-Trainer

From January 2026 to April 2026 **Revelo** Remote

Curated and annotated training data, evaluated LLM outputs, and fine-tuned model responses to improve accuracy and alignment. Collaborated with engineering teams to define quality metrics, reduced hallucination rates, and enhanced domain-specific performance for client-facing AI systems.

AI Automation & Backend System Projects(RAG, APIs, n8n)

From November 2025 to January 2026 **Private** Addis Ababa, AA, Ethiopia

- **AI Voice Receptionist** – Built an automated voice agent that handles inbound calls, answers FAQs, and books appointments via real-time workflows (caller details, availability, confirmations), reducing manual call handling for service-based businesses.
- **RAG Telegram Bot** – Developed a bot delivering top 5 daily political news using a RAG pipeline with document retrieval, LLM summarization, automated ingestion, and scheduled delivery.
- **RAG Customer Support Bot** – Created a support bot for real estate companies using RAG + vector search to answer inquiries from internal documents and listings, automating repetitive questions and cutting response time.

Back-end Developer

From July 2025 to September 2025 **EagleLion System Technology** Addis Ababa, AA, Ethiopia

Developed a **robust backend for the Visit Ethiopia platform**, delivering **secure, scalable RESTful APIs** with authentication and reliable data management. **GitHub:** github.com/amiz-seoat/visit-ethiopia-backend

Front-end Developer

From July 2024 to October 2024 **Kegeberew Technology Solutions** Addis Ababa, AA, Ethiopia

- Build responsive, user-friendly interfaces
- Convert designs into clean, efficient code
- Optimize performance and accessibility
- Integrate APIs and maintain reusable components
- Collaborate with designers and backend teams

Skills

Skills

- AI & LLM Systems: RAG, Vector Embeddings, Semantic Search, LLM APIs, AI Automation
- Backend: Node.js, Express.js, RESTful API Development, FastAPI
- Databases: MongoDB, PostgreSQL
- Frontend: React, HTML, CSS, JavaScript
- Authentication & Security: JWT, Role-Based Access Control (RBAC)
- Automation & Workflow Orchestration: n8n (Webhooks, API Integrations)
- Tools & DevOps: Git, GitHub, Postman, Docker
- Problem Solving & Algorithms: Python, Competitive Programming
